IMPORTANT!
This Quick Reference Guide does not replace the lift’s Instruction Guide, which can be downloaded from www.liko.com.

Safety Instructions

- Read the Instruction Guide for the lift and lifting accessories before use.
- Plan the lifting operation carefully.
- Before the patient is lifted from the underlying surface, but when the sling straps are properly extended, it is important to ensure that the straps are correctly attached to the slingbar.
- Max. load Uno 102: 175 kg (385 lbs.)
To retain max. load it is essential to use accessories rated for the same max. load or greater.

Emergency Stop

- Activate:
- Reset:

The object used to press with must not be sharp, since this may cause damage to the control box!

Electrical Emergency Lowering

- Charge the lift regularly after use.
- The lift does not function during charging.
- The emergency stop should not be pressed in during charging.

Mechanical Emergency Lowering

Adjustments

For more information read the Instruction Guide.

Position of the Lift when Lifting

Unbalanced lifting poses a tipping risk!

Charging of Batteries

For more information read the Instruction Guide.

Ergonomics

- Never lift manually – let the lift unit do the lifting.
- Take it easy. Work calmly and methodically.
- Don’t strain your back! Work in a walking stance with your back straight.
- Use the bed’s raising and lowering functions.
- Reduce the lever effect. Work close to the patient and the lift.

Cleaning

When necessary, clean the lift with a moist cloth.

Simple Troubleshooting

Check to ensure that:
- emergency stop is not pressed in, see 2
- the battery is charged
- the hand control is properly connected.
