IMPORTANT!
This quick reference guide does not replace the lift’s user manual. Liko™ user manuals can be downloaded from www.liko.com.

Safety Instructions

⚠️ This warning symbol indicates that special care should be taken. If instructions are not followed there is a risk of serious injury to patient or caregiver.

- Read the user manual for the lift and lifting accessories before use.

- Plan every transfer situation carefully

- Before the patient is lifted from the underlying surface, but after the straps have been fully extended, make sure the straps are properly connected to the sling bar.

- Maximum load: LikoGuard™ L: 272 kg (600 lbs.)
  LikoGuard™ XL: 363 kg (800 lbs.)

⚠️ The entire lift system’s total maximum load is always determined by the product of the system that has the lowest specified maximum load.

1. Hand Control
2. Emergency Stop
3. Mechanical Emergency Lowering
4. Limit Switch
5. Quick-release Hook
6. Latches

Charging with wall charger

The lift can not be charged with the emergency stop activated.

Ergonomics

- Never lift manually – let the lift do the lifting.
- Take it easy. Work calmly and methodically.
- Don’t strain your back! Work in a walking stance with your back straight.
- Use the bed’s raising and lowering functions.
- Reduce the lever effect. Work close to the patient and the lift.

Cleaning

When necessary, clean the lift with a moist cloth. For detailed information regarding cleaning and disinfection we refer to the user manual.

Simple Troubleshooting

Check to ensure that:

- the emergency stop is not activated,
  if the emergency stop is activated, reset it, see

- the battery is charged.

Other Quick Reference Guides
